Launch of the first Indosuez Funds bond fund - Chronos Green Bonds 2028¹

Indosuez Wealth Management announces the launch of Indosuez Funds - Chronos Green Bonds 2028, the first SFDR bond fund² in the Indosuez range to be classified as Article 93. It makes it possible to invest in green bonds in companies running projects having a positive impact on the environment (renewable energy, green buildings, or clean transport, for example).

Against a backdrop of a booming green bond market⁴, Indosuez Funds - Chronos Green Bonds 2028 offers an attractive and responsible investment opportunity.

Offered to investors with a conservative risk profile, Indosuez Funds Chronos Green Bonds 2028 is a fixed-maturity fund that offers visibility on the potential performance that will be delivered at maturity. It thus ensures returns while promising a moderate risk.

The Indosuez Funds Chronos Green Bonds 2028 fund comprises around sixty securities, from different sectors and geographical areas, offering a wide range of investments and a good distribution of risk.

Indosuez Funds Chronos Green Bonds 2028 only finances companies that commit to carrying out projects that relate to the United Nations Sustainable Development Goals. The portfolio is made up of securities meeting the ICMA Green Bond Principles international standard⁵.

This portfolio is built in conjunction with credit analysts and ESG analysts from Indosuez Wealth Management. The companies financed by the fund are selected by Indosuez Wealth Management's bond management team, on the basis of a fundamental analysis and their ESG quality. The fund is managed by Indosuez Wealth Management's bond management team based in Paris. This team is in charge of managing various bond issues totalling €1.4 billion under management.

¹ The marketing of collective investment vehicles is governed by specific distribution legislation depending on the vehicle's country of registration and the investors' country of residence. For more information, please contact your usual advisor or refer to the prospectus and key information document before making any decision.

The objectives of companies financed by Indosuez Funds Chronos Green Bonds 2028 are monitored by independent, external rating companies and non-profits, ensuring projects are conducted appropriately.

Alexandre Drabowicz, Chief Investment Officer of Indosuez Wealth Management, said: "We are innovating by offering our private clients the opportunity to take advantage of attractive rates in the bond markets, while investing in sustainable bonds in our first Article 9 maturity fund. The green bond market has grown considerably in recent years. Originally intended for institutional investors, it is now open to private investors. This is consistent with our wish to support the financing of the energy transition and our clients' growing wish to contribute through appropriate solutions."

The United Nations has set 17 major Sustainable Development Goals for 2030. To achieve these objectives, investment needs across all sectors have been estimated at between \$5,000 and \$7,000 billion per annum. Government subsidies and international aid programmes alone will not be enough to meet these needs. To address these global challenges, taking action and finding sources of private investment are crucial. The UN estimates that achieving these goals could generate \$12,000 billion in business opportunities and create 380 million jobs by 2030.*

About Indosuez Funds – Chronos Green Bonds 2028

Sub-fund of the Indosuez Funds SICAV (open-ended investment company), a UCITS under Luxembourg law

The objective of Indosuez Funds Chronos Green Bonds (“The Fund”) is to generate a return and/or a capital gain by 31 December 2028. After this date, the Product will (i) implement a new investment policy, or (ii) be liquidated, or (iii) be merged into another Product of the Company or another UCITS. In each of the three cases mentioned above, the decision will be duly communicated to the shareholders and reflected in an updated prospectus, while the communication to the shareholders will be accompanied by notice.

The Fund will mainly follow a buy-and-watch investment approach and will invest mainly in bonds known as “green bonds” denominated in euros. Such bonds comply with the Green Bond Principles and their purpose is to contribute to financing the ecological transition.

The Product is actively managed and does not track a benchmark.

Please refer to the SFDR Appendix of the Prospectus for all binding elements. The Fund is not guaranteed to achieve the investment objective or generate a return on investment. You may not get back all of your invested capital.

Investment horizon: 5 years.

Sub-fund reference currency: EUR. When the reference currency of the product differs from that of your country, currency fluctuations can have a negative impact on the net asset value, performance and costs. Yields may rise or fall as a result of fluctuations in exchange rates.
